

Samuel Ab. Gebremariam

Aspiring Data Scientist

About me

Aspiring Data Scientist pursuing a BSc in Data Science and Analytics at USIU-Africa. I have experience with large datasets and translating findings into actionable insights. Proficient in Python, R, SQL, and visualization tools like Tableau and Power BI. I am passionate about using data to enhance user experiences and promote accessible education.

EDUCATION

2023–2026

BSc in Data Science and Analytics

NAIROBI · Kenya

I am pursuing a Bachelor of Science in Data Science and Analytics at United States International University - Africa, where I study statistical analysis, machine learning, and data visualization, emphasizing real-world applications that enhance decision-making and user experiences.

2019–2021

BSc in Information Technology

MEKELLE · Ethiopia

At Mekelle University, I studied Information Technology, focusing on computer systems, networking, and software development, with proficiency in Java and C. My education was disrupted in my second year due to civil war, but it provided me with valuable programming skills and insights into technology's role in modern business.

2015–2019

High School Diploma

MEKELLE · Ethiopia

Achieved a high school diploma from Kallamino Special High School, a prestigious institution in Ethiopia, with a strong focus on mathematics and sciences. This education fostered my early interest in analytical thinking and problem-solving.

SKILLS

Technical

Programming Languages

Data Visualization: Tableau, Power BI, Seaborn, Matplotlib

Machine Learning Techniques: Regression, Classification, Clustering

Soft

Analytical Thinking

Problem-Solving

Strong communication

Enhanced Presentation skills

Team Collaboration and Leadership

EXPERIENCES

- **Representative:** Ethiopian Community of USIU-Africa (Current)

I advocate for community needs, organize events, and foster unity among members. I utilize the power of visualizations in my leadership.

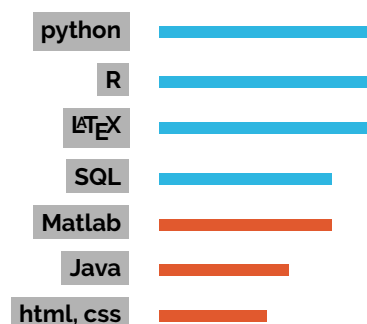

- **Tutor** – Araya Charity Club (2018 - 2021) Provided tutoring in mathematics and computer science, enhancing student learning through personalized education.

- **Volunteer Fundraiser:** Lola Children's Home (2019 - 2021) Led initiatives using data analysis to track donations and improve resource allocation for children's welfare programs.

- **Math Club Member** – USIU-Africa (Current)

I Collaborate with peers on math-related challenges, fostering analytical thinking and problem-solving skills while enhancing my ability to work in teams.

PROJECTS

Python	Big Data Architecture 📍 Designed a scalable data engineering workspace implementing the Medallion (Bronze, Silver, Gold) architecture using Apache Spark, Hadoop, Kafka, SQL, and modern ETL pipelines for analytics-ready data.
Python	Fantasy Premier League Squad Optimization 📍 Developed an optimization model to build an optimal Fantasy Premier League squad by maximizing expected points while satisfying budget and squad constraints using Python.
Excel	Loan Default Analysis & Dashboard 📍 Performed exploratory analysis on bank loan data using Microsoft Excel and built an interactive dashboard to identify default patterns and support data-driven decision-making.
Power BI	Sales Performance Analysis Dashboard 📍 Designed an interactive Power BI dashboard to analyze sales performance, customer behavior, and business KPIs through dynamic visualizations.
Python	Data Warehousing ETL Pipeline 📍 Built an end-to-end ETL pipeline using Python, Pandas, SQL, and SQLite, demonstrating data extraction, cleaning, transformation, and loading into a structured warehouse.
Python	Association Rule Mining Simulation 📍 Implemented the Apriori algorithm using Python and mlxtend to discover frequent itemsets and association rules from simulated retail transaction data for market basket analysis.
