

SAMUEL ABRHA GEBREMARIAM

Aspiring Data Scientist

Nairobi, Kenya | +254 701 211 210 | abrhsamuel@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFILE

Aspiring Data Scientist pursuing a BSc in Data Science and Analytics at United States International University–Africa. Skilled in machine learning, natural language processing, data engineering, and end-to-end ETL pipeline development. Experienced in extracting insights from large datasets and translating data into actionable solutions. Proficient in Python, R, SQL, Tableau, and Power BI, with a strong interest in developing AI-driven technologies for social impact and digital inclusion.

EXPERIENCE

Community Representative

2023 – Present

Ethiopian Community of USIU-Africa · Nairobi, Kenya

- Advocate for community needs, coordinate large-scale events, and foster unity among members.
- Leverage dashboards and data visualizations to demonstrate community metrics and improve planning outcomes.

Math Club Member

2023 – Present

USIU-Africa · Nairobi, Kenya

- Collaborate with peers on math-related challenges and host problem-solving peer review sessions.
- Foster continuous group learning in advanced statistics and quantitative analysis, strengthening analytical thinking and teamwork.

Volunteer Fundraiser

2019 – 2021

Lola Children's Home · Mekelle, Ethiopia

- Led data-tracking initiatives, analyzing donation distributions and donor trends.
- Improved resource allocation efficiency for child welfare programs through data-driven recommendations.

Mathematics & Computer Science Tutor

2018 – 2021

Araya Charity Club · Mekelle, Ethiopia

- Provided tutoring in mathematics and computer science to high school and early college students.
- Structured personalized lesson plans that strengthened core mathematical logic and programming foundations.

EDUCATION

BSc in Data Science and Analytics

2023 – 2026

United States International University - Africa (USIU-Africa) · Nairobi, Kenya

Intensive study of statistical methods, machine learning, predictive analysis, natural language processing, and data visualization, with an emphasis on implementing data strategies for real-world impact.

BSc in Information Technology

2019 – 2021

Mekelle University · Mekelle, Ethiopia

Focused on computer systems, networking, databases, and programming (Java, C). Studies were disrupted in the second year due to civil conflict, which prompted a transition into data science.

High School Diploma

2015 – 2019

Kallamino Special High School · Mekelle, Ethiopia

Graduated from a selective, science-focused institution with a strong emphasis on mathematics and the sciences, fostering an early interest in analytical thinking and problem-solving.

SKILLS

Programming: Python, R, SQL, MATLAB, Java, HTML/CSS, LaTeX

Data Visualization: Tableau, Power BI, Seaborn, Matplotlib

Machine Learning: Regression, Classification, Clustering, Predictive Analytics

Data Engineering: ETL Pipelines, Apache Spark, Hadoop, Kafka, Medallion (Bronze/Silver/Gold) Architecture, SQLite/Postgres

Soft Skills: Analytical Thinking, Problem-Solving, Communication, Presentation, Team Leadership & Collaboration

PROJECTS

Big Data Medallion Architecture

Python · Big Data

- Designed a scalable data engineering workspace implementing the Medallion (Bronze, Silver, Gold) architecture using Apache Spark, Hadoop, Kafka, SQL, and modern ETL pipelines for analytics-ready data.

Fantasy Premier League Squad Optimization

Python · Optimization

- Built a linear optimization model to construct the best possible fantasy football squad, maximizing expected points subject to budget and squad constraints.

Loan Default Analysis & Dashboard

Microsoft Excel · Financial Analysis

- Performed exploratory analysis on bank loan data and built an interactive dashboard to identify default patterns and support data-driven decision-making.

Sales Performance Analysis Dashboard

Power BI · Sales Analytics

- Designed an interactive dashboard to analyze sales performance, customer behavior, and business KPIs through dynamic visualizations.

Data Warehousing ETL Pipeline

Python · SQL ETL

- Built an end-to-end ETL pipeline using Python, Pandas, SQL, and SQLite, covering extraction, cleaning, transformation, and loading into a structured warehouse.

Association Rule Mining Simulation

Python · Association Rules

- Implemented the Apriori algorithm using Python and mlxtend to discover frequent itemsets and association rules from simulated retail transaction data.

CERTIFICATIONS & ACHIEVEMENTS

- **Mastercard Foundation Scholarship:** Awarded a fully funded merit- and leadership-based scholarship to pursue a BSc in Data Science and Analytics at United States International University–Africa.
- **Mekelle Institute of Technology Merit Scholarship:** Earned admission through a competitive scholarship examination to pursue undergraduate studies in Information Technology.
- **Tigray Development Association Scholarship:** Awarded a competitive merit-based scholarship to pursue fully funded secondary education at Kallamino Special High School, Ethiopia.
- Dean's List Achiever at USIU-Africa (7 Consecutive semesters)
- Transformative Leadership Training
- AI Career Essentials
- Cybersecurity Essentials
- Automatic speech recognition hackathon participation
- Python · Data Manipulation (Pandas)
- SQL · Intermediate SQL
- R · Data Manipulation (dplyr)
- Power BI

- ❖ Selected certifications and supporting documents are available in my online portfolio:

[Portfolio](#)

LANGUAGES

- Tigrinya — Mother tongue
- Amharic — C2 (Proficient)
- English — C2 (Proficient)
- French — A1 (Beginner)

AREAS OF INTEREST

- Data Science & Analytics
- Learning New Languages
- Community Engagement
- Reading & Research
- Travel & Exploration
